Summary

I'm a computer science enthusiast and a student currently located in Helsinki area. I found great interest in programming ever since I found out about it and fell in love with the problem solving challenges and endless room for improvement it offers. The more I learn new skills the more I discover ideas and areas where I can improve myself, this has driven me to continuously trying to improve myself. I'm currently studying Computer science at the University of Helsinki.

Check out my resume page to see more information about me and about my software development knowledge!
